EDUCATION

Siddaganga Institute Of Engineering

Bachelor of engineering - Information science and engineering
2024-2028 | CGPA : 8.83/10

TECHNICAL SKILLS

Languages: C, Java, Python

Operating Systems: Linux, Windows, macOS

Web Development: HTML, CSS, JavaScript, Tailwind CSS, React

Tech-Stack: MERN Stack (MongoDB, Express, React, Node.js)

Core CS: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

PROFESSIONAL EXPERIENCE

Open Source Contributor | GirlScript Summer of Code.

April 2025 – Present

- Contributed feature implementations and bug fixes to open-source repositories using Git/GitHub workflows
- Improved documentation and participated in distributed code review cycles

PROJECTS

DocReader — AI Document OCR Web Application | [GitHub](#) | [Live Demo](#)

React | FastAPI | Tesseract OCR | NLTK | Docker

- Built a full-stack OCR web application using React and FastAPI to extract and summarize text from document images
- Integrated Tesseract OCR and NLTK for text extraction, tokenization, and keyword-based summarization
- Implemented drag-and-drop uploads with real-time OCR processing and word-level confidence analysis
- Containerized the application using Docker to run React frontend and Python backend in a single deployment

SADDA PRTC – Smart Transit Prototype | [GitHub](#)

Node.js | Express | MongoDB | React Native | Expo

- Built a real-time bus tracking and transit management prototype inspired by Namma BMTC using Node.js, Express, MongoDB, and React Native
- Implemented RESTful APIs for live vehicle tracking, route management, and fare calculation using MongoDB geospatial indexing
- Developed a React Native mobile client with multilingual support and adaptive polling for real-time transit updates
- Integrated rate limiting, environment configuration, and Socket.IO scaffolding for scalable real-time communication

ResearchGate Club Website | [GitHub](#) | [Live Demo](#)

Next.js | MongoDB | Tailwind CSS | Clerk | Framer Motion

- Developed a full-stack website for a college research club using Next.js, MongoDB, and Tailwind CSS
- Implemented secure authentication and role-based access control using Clerk for members and administrators
- Designed database models for users, events, publications, and merchandise using MongoDB and Mongoose
- Enhanced user experience with Framer Motion and GSAP animations along with responsive dark-mode UI

CERTIFICATIONS & ACHIEVEMENTS

- Top 10 Finalist, Smart India Hackathon (SIH) 2025 : Competed against 200+ teams across different departments
- AWS SimuLearn: Cloud Computing Essentials.
- Google AI Essentials
- Contributed to open-source web development projects.
